

Team ID	PNT2022TMID18511
Project Name	Car Resale Value Prediction

Project Flow

- To enter the input features, the user engages with the user interface (UI).
- The integrated model analyses the input features that are entered.
- The prediction is displayed on the UI when the model has processed the input.

We must finish all of the projects and tasks on the following list in order to achieve this.

- Download the dataset.
- Pre-process or clean the data.
- Analyse the pre-processed data.
- Train the machine with pre-processed data using an appropriate machine learning
- algorithm.
- Save the model and its dependencies.
- Build a Web application using Flask that integrates with the model built
